

As you are aware, literacy levels are a constant issue for the education department. School curriculums give teachers little leeway in allowing for children who are slower to learn and at risk of slowing down the whole class.

There is a simple solution to this situation. Writeboards® is a new product that will prove to be very beneficial to students, teachers and the reputation of the School.

Writeboards® is a transparent board that children can learn to:

- form their letters and numbers correctly;
- add, subtract, divide and practice their times tables;
- have fun drawing, playing games, copying, tracing, painting and the list goes on.....

Features of Writeboards®

- Children enjoy practicing their writing skills on this unique board and when they are finished simply wipe the board clean.
- Writeboards® will reduce the pressure on slow learners in a classroom environment, as both slow and fast learners can use the product.
- Writeboards® enables teachers to make their own special underlays or templates.
- The Writeboard is a functional tool that can be used from pre-school through to Year 6.
- By re-using the range of underlays over and over, schools can save valuable money on paper and printing costs.
- Writeboards® make the teachers work easier, as children love using them.
- Writeboards® are light and sturdy and will last for years in a classroom.
- A worthwhile investment.
- You can adapt your own school programs to the Writeboards® teaching aide.

"The Right Board"

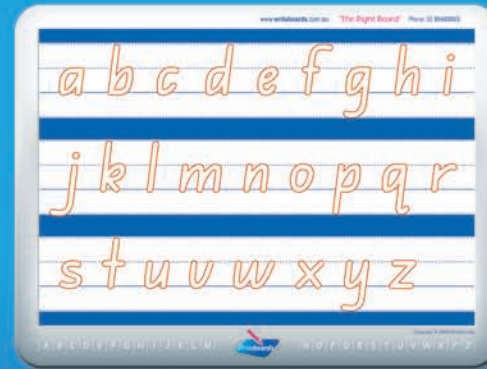

New underlays are constantly being developed, from our toddler range, to clocks, maps, and basic music. Why not be creative and simply design your own?

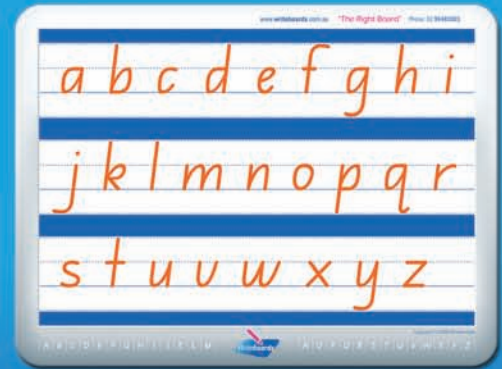

Learn to form letters correctly, with these easy to follow directional arrows. Writeboards follow your departments rules, on writing styles, in all state fonts.

Progress to just dots in either lower or upper case lettering.

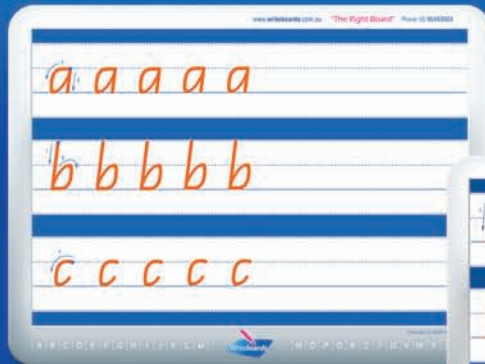

Outline letters have been designed to develop fine motor skills, as students have to write in-between the lines.

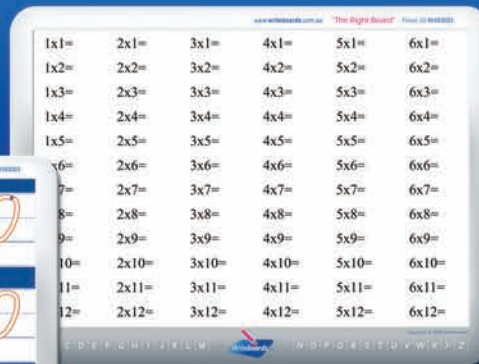

Children's self confidence improves as they can easily rub out anything wrong and correct their mistakes with ease. Children are also happier.

All letters come with and without the option of directional arrows.

Students can be given focused learning underlays or templates that target their individual needs.

Easy to learn numbers.

Practice all these mathematical equations, both with and without answers (includes addition, subtraction, division and times tables).

Children can draw, trace and paint. When they are finished their artwork can be scanned or photocopied, adding to the student records.

Writeboards®
are perfect for School
Fundraising Drives

Writeboards® are available in
packages to suit your individual school's requirements.
